

Cluster Analysis Report — Cluster 2

Generated: 20251205_224919
Customer Count: 5

Executive Summary

Cluster 2 includes high-income, self-employed individuals with excellent credit scores, residing in tier1 cities. Despite negative confidence scores, their financial profiles suggest strong potential for car loans. The average confidence score is -0.91, with a median of -0.72. It is recommended to target this segment with specialized loan products and marketing strategies, considering their high repayment capacity and creditworthiness.

Cluster Overview

This cluster consists of high-income, self-employed individuals residing in tier1 cities. Despite their negative confidence scores, they have excellent credit scores, making them strong candidates for car loans.

Confidence Score Distribution

Average: -0.909
Range: -1.592 - -0.550
Median: -0.723

Key Prediction Factors

- 1. High income levels
- 2. Excellent credit scores
- 3. Residence in tier1 cities

Recommendations

- 1. Focus marketing efforts on high-income, self-employed individuals in tier1 cities.
- 2. Develop loan products tailored for self-employed individuals with high credit scores.
- 3. Consider additional factors beyond confidence scores for loan eligibility to capture high-value customers.
