

Cluster Analysis Report — Cluster 6

Generated: 20251205_224945
Customer Count: 5

Executive Summary

The cluster exhibits strong potential for car loan eligibility, with high average incomes and credit scores. The confidence scores are generally positive, though there is an outlier with a negative score. Recommendations include focusing on high-confidence customers, addressing data duplication, and reassessing outliers with strong financials. These actions could enhance loan approval rates and customer satisfaction.

Cluster Overview

This cluster consists of salaried individuals predominantly residing in tier 2 cities with high incomes and good credit scores. Despite some data duplication, the overall confidence in their eligibility for car loans is high, with one outlier showing a negative confidence score.

Confidence Score Distribution

Average: 1.018
Range: -0.873 - 1.860
Median: 1.510

Key Prediction Factors

- 1. High income levels
- 2. Good credit scores
- 3. Stable employment as salaried individuals

Recommendations

- 1. Focus on customers with high confidence scores for immediate follow-up.
- 2. Investigate and resolve data duplication issues to ensure accurate analysis.
- 3. Consider additional assessment for customers with negative confidence scores but strong financial profiles.
