

Cluster Analysis Report — Cluster 2

Generated: 20251205_224927
Customer Count: 5

Executive Summary

This cluster comprises financially stable, self-employed individuals from tier 1 cities, characterized by high incomes and excellent credit scores. Despite negative confidence scores, their financial metrics suggest they are viable candidates for car loans. The sales team should target these customers with personalized loan products and emphasize flexible repayment options to address any confidence concerns. Management should consider leveraging these insights to enhance marketing strategies and improve loan approval rates.

Cluster Overview

This cluster consists of high-income, self-employed individuals residing in tier 1 cities. Despite their negative confidence scores, their high credit scores and substantial incomes suggest strong financial stability, making them potential candidates for car loans.

Confidence Score Distribution

Average: -0.816
Range: -2.083 - -0.343
Median: -0.550

Key Prediction Factors

- 1. High credit scores indicating good creditworthiness
- 2. Substantial income levels suggesting financial capability
- 3. Residence in tier 1 cities, which often correlates with higher economic activity

Recommendations

- 1. Focus on personalized loan offerings that cater to self-employed individuals.
- 2. Highlight flexible repayment options to attract customers with negative confidence scores.
- 3. Leverage high credit scores in marketing campaigns to enhance customer trust.
