

Cluster Analysis Report — Cluster 2

Generated: 20251205_224831
Customer Count: 5

Executive Summary

This cluster represents a group of financially stable, self-employed individuals with high incomes and excellent credit scores, predominantly residing in tier1 cities. The average confidence score is positive, indicating strong potential for loan eligibility. The sales team should target similar demographics for car loan products. Addressing data accuracy and understanding outliers will enhance customer insights and improve targeting strategies.

Cluster Overview

This cluster consists of high-income, self-employed individuals residing in tier1 cities, with excellent credit scores. Despite one outlier with a negative confidence score, the majority of customers show strong potential for loan eligibility.

Confidence Score Distribution

Average: 0.659
Range: -0.590 - 1.197
Median: 0.867

Key Prediction Factors

- 1. High income levels above 9 million
- 2. Excellent credit scores above 800
- 3. Residing in tier1 cities with better access to financial services

Recommendations

- 1. Focus marketing efforts on high-income, self-employed individuals in tier1 cities
- 2. Address the negative confidence score outlier to understand potential risks
- 3. Ensure data accuracy to prevent duplication in customer records
